D-Robotics RDK X5 Case

BRIEF

RDK X5 Case is a full-metal black enclosure designed for the RDK X5, offering solid protection and effective heat dissipation. The cut-out design around the ports and antenna ensures stable signal transmission and plug-and-play usability, while four screws secure the case for easy assembly and removal. It includes an adjustable mount compatible with OpenMV cameras, K210 modules, the RDK X5 Camera Module, and linear CCDs. The mount features a graduated hinge to preserve calibrated angles, preventing misalignment during transport—ideal for use cases such as electronics competitions where consistent setup is crucial.

SAFETY INSTRUCTIONS

To Avoid Malfunction Or Damage:

- This product is intended for use exclusively with the RDK X5.
- Operate this product only in a well-ventilated environment. Do not place any objects on top of the enclosure.
- Do not expose the product to water or moisture during operation, and avoid placing it on conductive surfaces.
- Do not expose the product to external heat sources. The RDK X5 Case is designed to operate reliably under normal ambient temperatures.
- Avoid touching the metal enclosure while the RDK X5 is powered on, as it may become hot and cause burns.
